

## Success Tips for Science

1. Do **all** assigned work completely. Take your time and write **complete** answers.
2. Turn all work in **on time**.
3. Read all assigned readings thoroughly, and do the assigned workbook pages.
4. **Study** your Notes, Key Terms, and workbook pages to prepare for tests and quizzes.
5. Write your Agenda and completely answer the Warm-up each day.
6. Write your homework assignment in your Binder Reminder.
7. Keep track of your grade on your Assignment Sheet.
8. Keep an **organized** Science Notebook, the way it is described in the section below.
9. **PARTICIPATE** in classroom discussions, and ask questions if you don't understand
10. Copy the Agenda, Warm-up, and Homework assignment from the **teacher's Science Notebook** when you return from an absence.

### Notebook Organization

- You will need a **separate** notebook (1") that will be used only for science.
- The following four sections must be included in the notebook **using dividers**.
- Notebooks will be checked each quarter for a grade.

#### 1. Assignment Sheet and Information:

- All graded assignments will be recorded on the assignment sheet to help you keep track of your grade.
- Informational handouts will be kept here the entire year.

#### 2. Agenda and Warm-up:

- The Agenda and Warm-up for each day will be written on the same sheet of paper.
- Each entry should be **dated**, and parents can look at this section to see an overview of what the students have done during the day.

#### 3. Current Work:

Class notes, hand-outs, homework and all other work that has not been turned in should be kept here.

#### 4. Graded assignments:

- All graded assignments should be **saved** and placed in this section.
- This will help you in two ways:
  1. You can study for tests and quizzes from the assignments.
  2. If the teacher makes an error in grading or recording your score, you have the paper to show what the true score is.

**Do not** cut off, I will just check for signatures
